

product solution

Fotec FOTECOAT 1076 Emulsion

FOTECOAT 1076 is a fast, dual-cure, diazo photopolymer screen process emulsion for solvent-based ink systems. It can be used for the finest line printing, including industrial printing applications that require very high resolution. Also, after developing, the stencil is very hard with low swell characteristics.

 **\$103.22 / GAL**

FEATURES

- Blue color
- Medium viscosity
- For lower viscosity, water can be added
- Solids content of 37% after sensitizing
- Let degas after sensitizing
- Sub-micron dual cure technology
- Optimum mesh bridging
- Smooth sidewall geometry for optimum paste release
