

product solution

Fotec FOTECOAT 1850 Emulsion

FOTECOAT 1850 is a fast, presensitized polymer emulsion that is free of diazo. The emulsion has a light grey-blue color and the stencil has excellent see-through. FOTECOAT 1850 is best worked with under yellow light due to its increased light sensitivity. Because it doesn't require mixing, the emulsion can be used immediately. It has a solids content of 36 percent.

 **\$64.60 / GAL**

FEATURES

- Blue color
- Medium viscosity for manual and machine coating
- Best print results are achieved on dyed and steel mesh
- Ideal for thick film stencil production
- No post-exposure needed
- Water resistant
